Study to improve the electronic systems of payment of local taxes

0 photo 0 audio 0 video 0 other files

The company DotCommerce Romania will be completed during the period from July 20 to August 3, a study for the performance deficiencies of applications and electronic payment of fees and local taxes, announced the Ministry of Communications and Information Technology (MCIT).

The analysis consists of three modules, structured by categories of respondents: financial institutions, municipalities and users (Advertisers taxes and local taxes).

For financial institutions and municipalities will use methods of research will investigate methods of payment available online. For natural and legal persons paying taxes and local taxes to provide an online application, hosted on the site www.cercetareonline.ro, where they will be able to express their opinion about payment methods currently used, as and expectations related to these services and their alternatives, shown in the communicate.
