

Noi produse wireless de la SMC

SMC® Networks a anunțat lansarea familiei de produse wireless 802.11b/g la 108 Mbps, EZ Connect™ 108G. Router-ul wireless EZ Connect g 802.11g la 108 Mbps, SMCWBR14T-G, adaptorul wireless cardbus SMCWCBT-G, adaptorul USB wireless SMCWUSBT-G și adaptorul PCI wireless SMCWPCIT-G sunt deja disponibile, gama urmând să fie completată în luna iulie prin lansarea unui bridge Ethernet wireless EZ Connect g 802.11g la 108 Mbps, SMCWEBT-G, și a unui kit, SMCWUSBKIT-G, care combină router-ul wireless EZ Connect g 802.11g la 108 Mbps cu un adaptor USB wireless.

SHARCNET va achiziționa patru clustere HP

HP va furniza rețelei canadiene de cercetare academică Shared Hierarchical Academic Research Computing Network (SHARCNET) patru noi clustere pentru calculul de înaltă performanță. Acestea vor crește capacitatea rețelei de la 1000 la 6000 de procesoare.

Upgrade-ul va costa rețeaua SHARCNET (compusă din 11 instituții academice) 20 de milioane de USD. El va permite rețelei să facă față cerințelor de calcul de înaltă performanță (HPC), aflate mereu în creștere, și să își materializeze obiectivul de creare a unuia dintre cele mai importante griduri de calcul din lume.

Se estimează că extinderea clusterului va permite SHARCNET să accelereze obținerea de rezultate în cercetare în domeniul de maximă importanță cum ar fi genomul uman. HP estimează că platforma, care va fi instalată la începutul toamnei, va reprezenta cel mai puternic super-computer din Canada, și că acesta va fi inclus în lista de supercomputere Top500.

K Tech – Ultra PRO este pregătit pentru programul social Euro 200 inițiat de Guvernul României

Începând din data de 7 iulie 2005, cei 25.001 beneficiari ai programului Euro 200 sunt așteptați în magazinele Ultra PRO Computers din toată țara. Prin intermediul cuponului EURO 200, aceștia vor putea achiziționa orice calculator disponibil în oferta Ultra PRO Computers sau vor putea opta pentru o configurație construită la cerere. Diferența de preț va putea fi achitată pe loc sau în rate, cuponul fiind în acest caz un avans.

Celor care doresc să achiziționeze un computer complet (unitate centrală, monitor, tastatură și mouse) la un preț foarte accesibil, K Tech – Ultra PRO le pune la dispoziție o configurație promoțională la un preț de doar 999,9 lei noi.

Service Advantages @: e-tranzact and sursedefinantare.ro

The Industry, Commerce Chamber of Romania and DotCommerce launched, within a partnership, an electronic commerce service, e-tranzact, targeting the business community. For the most part the service allows the generation of invoices for clients, introduces the possibility of online payments with credit or debit cards, with guaranteed security; this service can be carried out by any economic agent as a buyer or a seller. www.sursadefinantare.ro, created by CCIRB is a unique information source concerning the financing of funds from banking or other sources that are at businessmen's disposal.

Dotcommerce Romania, affiliated to the homonym American company, entered the Romanian market in 2003. Its purpose was, among others, to develop e-commerce activities through the DotAssure system, aiming at three market segments: commercial companies, NGO and professional organizations, and governmental organizations. Once 300 merchants adopted the Dotcommerce online payment system, being convinced of the advantages brought by the electronic commerce, the CCIRB partnership was signed; CCIRB is "the most important organization in Romania that becomes our partner" stressed Mister Madalin Matică (Photo), European operation executive for DotCommerce. "CCRB studied very carefully all the offers existing on the market and the fact that it signed with us give us the guarantee that we are leaders on the market. This is a confirmation of the technical capabilities, both at the security and at the financial level because we state that we practice the lowest discount rates on the market."

CCIRB is a first client of the e-tranzact system, because it uses the payment system of accepting payment for the provided services. Analyzing the e-tranzact service, the main advantages observed by the participants were the flexibility of using the payment instruments, a big time saving for both the salesman and the buyer, and it was considered that there is a bigger capacity of penetrating the external

market with services", Misses Cornelia Rotaru, executive of CCIRB, stated.

"This system is projected as a help with startups and IMM-s that are not firmly convinced of the electronic commerce advantages and we wish for it to become an incubator of online stores. This system has the logistics and the commercial part ensured by CCIRB, the software ensured by us, and it gives the possibility to any merchant in Romania to accept online payments without being forced to have a dedicated shopping card, to implement security measure or any other logistical and technical changes."

The system offers the possibility of negotiating invoicing and negotiations can be supervised by the Commerce Chamber. Further, there is a risk and fraud department. Any client who wishes to utilize this service can find an adhesion form online at the URL: www.dotcommerce.ro/ccirb

In order to quicken the adhesion to e-tranzact, CCIRB has advantages that it offered to the merchants: the adhesion tax is 99 USD (with a 50% discount until the end of July), a reduction of the discount rate compared to the one of 9% normally used by DotCommerce.

From the point of view of secure access, the entirety of the security and information crypt structure resides on the accepting servers. The client will not be forced to buy additional security certificates or to encrypt communications.

"We believe that the majority of the payment accepters through the traditional methods will also accept the online payments. It will become notorious to accept online payments on your site.

We state that until April 2005,

the e-commerce turnover in Romania was roughly 4 million USD, over 50% of that was rolled through DotCommerces' gateway" declares in the end of our magazine Mister Matică. (R.D.)
